The best way is to start with 'Action Words' and their endings. The usual way action words are displayed in the Dictionary is the present tense, singular ending 'a' for example:

This basic or stem form is changed to say when the action happens and who does the action:

- yanggin - he/she/it walked (happened before- replace end 'a' with 'in')
- yangginanda - I walked (yangga now has 'in' plus 'anda' for 'I')

(All action words used in these examples can be found listed this way in the online dictionary or word search on Wurrekangurr at culture.yarkuwa.org.au/words/word_search You can search for the English word or the Wamba Wamba word.

These rules and endings can also be found in short list and grammatical form on pages 72-75 of the Green Book or online in 'Wembawemba Dictionary Section - Bound Forms' in the Document section of Wurrekangurr at culture.yarkuwa.org.au/documents .)

Person markers on action words

- 'who is doing' or 'how many are doing'

In Wamba Wamba we can describe 'who' and 'how many' are doing an action by adding different endings to action words called Person Markers.

Person markers are added after Time (or tense) markers.

1) He, she or it is doing

- 'a'

an 'a' ending is used when one person or thing (but not the speaker or the listener) is doing the action

(note: this 'a' ending is also used for the 'time ending - happening now')

for example - '*yangga*' (to walk) or '*nyanga*' (to burn)

In English you have to add the 'he' or 'she' or 'it' before the action word, for example 'he is walking home' or 'she walks home every day'.

In Wamba Wamba we use context or what has already been talked about to show which is the right meaning. For example:

'nyanga poty' can mean

- '*to burn grass*'

- '*he burns grass*' or '*she burns grass*' or '*it burns grass*' depending on what else has been talked about

'ngunyim-kurk pakaya-puk nyanga poty'

- 'That old woman is wise. She burns the grass.

Pronunciation Guide

In normal Wamba Wamba speech, we usually place the emphasis on the first and third syllables with the first being strongest. In day to day speech, traditional fluent speakers speak and pronounce sounds quite quickly and don't normally draw out sounds.

Standard sounds include:

Vowels

| | | | |
|-----------------|-----------------|---|--|
| 'a' as in 'car' | 'e' as in 'pet' | 'i' as in 'sit' | |
| 'u' as in 'put' | 'o' as in 'on' | 'ə' - neutral sound like the 'e' in 'the' | |

Variation - 1) when 'a' follows an initial 'w' and is followed by an 'r', 'ng' or 'n', eg 'waripa', 'warrang' or 'wanap' then it is pronounced as for 'a' in 'water' or 'war' (Note the second 'a' in each of the words above is pronounced 'a' as in 'car')

Variation - 2) the first 'a' in Wamba Wamba is pronounced as the 'a' in 'catch'.

Consonants

- 'rr' - roll or trill double 'rr's (if you can) but not single 'r',

- 'ty' is a palatal stop - say 'ty' with your tongue touching your palate

e.g. tyaka, Koletty. (If you are having trouble with the 'ty' sound then 'tch' as in 'fetch' is close but it is good to persist with the 'ty'.)

- 'ny' is a palatal and nasal sound. It is made by touching the top of the tongue to the top of the mouth behind your teeth and adding some nasal vibration while saying 'ny'. Eg nyenggin Nyakili

- 'th' is a hard sound like the English 'd' eg kuthanganda (say kuud-ahn-gahndah)

- 'ng' is a soft sound as in the English 'song' eg warrangng (*singing*), kalpang
(note - the first 'a' in 'warrangang' is an example of the variation 1 'a' as in 'war')

- 'ngg' soft 'ng' followed by a hard 'g' eg nyengggin, warranggang
